

**General Engineering software listing**  
**Summary of programs:**

<b>Software</b>	<b>Use</b>	<b>Size</b>
efus36.exe	A collection of various calculators and utilities designed for the electrical professional. Using an easy to navigate tabbed dialog interface E.F.U.S. provides a host of powerful and useful features.	1.36MB
efus36.zip	A smaller version of E.F.U.S s/w	1.07MB
RETScreen4.exe	This is a decision making tool for planners, decision-makers and industry to implement renewable energy and energy efficiency projects.	25.04 Mb
RoboRealm.zip	RoboRealm Video Processor contains all the tools you need for processing video images for use in robotic applications. It is a powerful, free, computer-vision based, application for use in machine vision, image analysis, and image processing systems.	309 Kb
turbine.zip	Calculate the steam consumption for a turbine of known power and efficiency. Required data are inlet steam pressure and temperature, and exhaust steam pressure. Program will determine steam consumption and outlet steam enthalpy.	461 Kb
Orbitron	This program gives the location of satellites at a real or simulated time.	1.95MB
PDFWriter	Converts files to PDF format	-
Qcheck	This is a utility for testing network response time, throughput, and streaming performance. It is also a valuable troubleshooting tool.	-
