# FLOW AND FISCAL METERING

## WHAT YOU WILL LEARN:

- Fundamentals and concepts of fiscal metering
- Fundamental principles of oil and gas measurements
- · Measurement standards
- · Custody transfer metering
- Operating procedures
- · Field instruments and their performance
- · Properties of fluids
- Different types of flow meters
- How to select, install, maintain and operate fiscal meters correctly
- · How to troubleshoot and repair fiscal metering devices
- · Personal measurement training

### WHO SHOULD ATTEND:

- Design Engineers
- Project Engineers and Managers
- Consulting Engineers
- Automation and Control Engineers
- Chemical and Mechanical Engineers
- Instrument Fitters and Process Control Technicians
- Maintenance Engineers
- Operations and Production Engineers
- · Measurement Technicians

Technology Training that Works

## The Workshop

This workshop is for engineers and technicians who need to have a practical knowledge of selection, installation and commissioning of fiscal metering equipment.

It is for those primarily involved in achieving effective results in industrial processes. This would involve the design, specification and implementation of control and measurement equipment.

The workshop focuses on practical applications, special attention to installation considerations and application limitations when selecting or installing different measurement or control instruments for fiscal metering.

## Training Methodology

The latest educational methods and strategies will be employed. The workshop is designed to maximise delegate benefit from the outset. Questions are encouraged throughout, to provide participants with the opportunity to discuss with the presenter and others, specific problems and appropriate solutions.

All delegates take away a detailed and comprehensive copy of the material presented, therefore minimal note taking is encouraged to ensure maximum delegate participation and attention. Practical hands-on training ensures knowledge retention.

## **Pre-requisites**

No specialist knowledge or skills are required only a technical background so that there is an understanding for such factors as the difference between pressure and force.

## **Practical Sessions**

This is a practical, hands on workshop enabling you to work through practical exercises which reinforce the concepts discussed.

To gain full value from this workshop, please bring your laptop/notebook computer.

## The Program

#### **DAY ONE**

#### INTRODUCTION TO FISCAL **METERING**

- Introduction
- Concepts and practice of custody transfer metering
- Flow metering and custody transfer measurement
- · Fundamentals of gas and liquid measurement

#### **FIELD INSTRUMENTS AND PERFORMANCE**

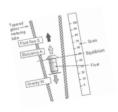

- · Field instrument technologies
- Fiscal quality measurement and methods
- Multiphase measurement
- Appropriate meter selection
- · Calibration and methods
- · Measurement standards
- · Primary, secondary and tertiary measurement equipment
- Sampling

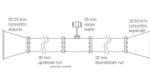

#### **OPERATING PROCEDURES**

- Introduction
- · Operating principles
- · Flow conditions
- Flow conditioners and types
- Fault conditions and mis-measurements
- Flow computers
- · Control charts

#### **BASIC PROPERTIES OF FLUIDS**

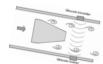

- · Basic fluid properties
- · Non-Newtonian fluids
- · Velocity profiles
- Reynolds number
- Flow measurement
- Mass flow rate
- Multi-phase flows)

## **On-Site Training**

- **SAVE** over 50% by having an IDC workshop presented at your premises.
- Customise the training to **YOUR** workplace.
- ✓ Have the training delivered when and where you need it.

www.idc-online.com

Contact us for a **FREE** proposal.

#### **DAY TWO**

#### **FLOW METERS**

- · Positive displacement meters
- Inferential meters
- · Oscillatory flow meters
- · Differential pressure meters
- · Variable area meters
- · Electromagnetic flow meters
- · Ultrasonic flow meters
- · Mass flow measurement
- · Open channel flow measurement

#### **INSTALLATION MAINTENANCE AND REPAIRS**

- Installation
- Commissioning
- Maintenance
- · Fault diagnostics and troubleshooting
- · Personal measurement training

#### **DOCUMENTATION**

- · Documentation procedure
- · Documentation control
