

# LED HIGHBAY LIGHTS

As we all become a lot more aware of how turning a light on in our homes affects our environment we are looking at ways of reducing this problem.. For this reason we have now seen the popularity of installing led highbay lights increasing. Not only do these types of lights produce a great deal less carbon emissions, they are a far deal cheaper to operate. However there are certain other reasons for you thinking using these types of LED lights over the more traditional ones that you can currently purchase. Below we take a look at a number of these.

Reason 1 - First off these types of lights have a much longer lifespan than conventional types of incandescent and fluorescent ones. On average LED lights have the ability to life 10 times as long as other lights. So of course you won't have to spend so much time and money on purchasing replacement ones. Also of course you won't have to constantly need to be doing the work of replacing them. Reason 2 - When it comes to LED lights these are considerably more energy efficient than incandescent and fluorescent lights.

On average LED lights use only between 2 and 10 watts of energy, this is around 66% less than that used by conventional lights. As these lights don't need so much electricity to power them then of course this will help to reduce how much your annual electricity bills will be. Reason 3 - LED high bay lights are not fitted with filaments so they are not only much more durable but also these lights are a lot more resistant to breaking. So of course the risk to them blowing or them popping is reduced. Reason 4 - You may be surprised to discover that these types of lights can prove beneficial when you need to

run air conditioning in your home. Remember that LED highbay lights don't use as much power and as a result they don't create as much heat.

So of course this means that you won't need to use your air conditioning as much to help reduce the levels of heat in your home. So of course not only are you cutting down the cost of running your air conditioning system, but also reducing how much you spend on maintaining it. Reason 5 - These kinds of lights produce a very white bright light so they provide a good amount of illumination. So of course this helps to ensure that when working in what can be a dangerous situation these lights will ensure that sufficient light is produced so any dangers can clearly be seen.

Also many companies have found that the brighter the light that is being emitted the higher levels of productivity produced by their employees. Above we have taken a look at just some of the reasons why installation of led highbay lights has increased in recent years. However of course the main reason people are choosing to install such led lights is because they want to help the environment and of course reducing their living expenses
