

# **REMOTE DATA BACKUP AND DISASTER RECOVERY SERVICES**

Years of IT support service enabled Solve Ltd. to provide superior IT services for businesses – some of these include; remote data backup and disaster recovery services! Businesses can now have peace of mind knowing that their critical and sensitive data is fully protected and recoverable. By utilizing Solve Ltd.' IT services, the assurance of data's security is of utmost importance and a relief to all business owners.

The specialized remote data backup and disaster recovery is a remote service that backs up and recovers the business' data. Through a reliable and secure offsite location, and with the highest encryption available – it protects your digital data automatically, and is able to restore it at anytime from anywhere! Solve Ltd. uses military grade security, which is definitely a reassurance, to all businesses that require top security for their critical data.

You have the ability to access your data 24 hours, 7 days a week. All this, and including; world class customer support is what you can expect from Solve Ltd. The internet vault enables businesses' user-friendly functions and at a reasonable cost, regardless of the size of your business!

The multiple advantages of using data backup and recovery service are that the data is compressed and encrypted, for security measures, as well as allowing you to establish the automatic backup schedule. By doing this, the data is transported to an offsite secure data center. In addition to this, reports are produced, and the data backs up again to provide a second offsite copy. The data is saved on hard drive disk arrays for immediate online recovery. The convenience of restoring data anytime, from any computer is a prominent feature. This is done by installing an agent-less software into one computer or server.

This system is a better, and simplified method to store valuable business and personal data. Solve Ltd. brings security and convenience for businesses that need to focus on business tasks, rather than worry about the safety and security of their sensitive information and data.

Every business has important and sensitive data and information that needs to be safeguarded, as well as being easily accessed. In the event of an unfortunate disaster, businesses can rest assured that their data is safe, and secure and recoverable. This particular service; remote data backup and disaster recovery service is crucial, in order to preserve a business' significant information. Solve Ltd. has many solutions for businesses, to make their business operations more smooth and efficient.

Is there anything more reassuring and convenient than knowing that your business' data is highly secured and easily accessible? And, by knowing that qualified technicians at Solve Ltd. are readily available, to assist with your IT support needs; is a valuable assurance for all business owners.

Business owners can relax by knowing that their computing systems are up-to-date and the valuable remote data backup and disaster recovery service is available to them. Obtaining these necessary and vital services from a reputable IT support service, such as Solve Ltd., for a reasonable rate, permits all business owners to keep up-to-date with the progression of technology and apply them to their own business' IT needs.
